

# ACHIEVING WORKFORCE GOALS - TOGETHER

## Reliable Access Control and Workforce Management for Construction Sites

### About Us

IBC has been on the cutting edge of access control systems since 2001. Our cloud based Site Access Manager brings our expertise to your job site.

### Physical Security Hardware

Utilize SecureByMAC's patented modular full height turnstiles and vehicular gates.

Also available are pedestals, handheld readers, portable card reader cases, mustering stations, or combination of these in other areas around your site.

### Workforce Management

IBC's cloud-based platform allows for quick and easy Worker Onboarding. Workers scan a QR code before arriving onsite to pre-register. SST/ Certifications can be managed, and badges can be promptly issued.

Site access can be controlled by zone, SST/ Certifications, shifts, and QR code health screenings.

### Reporting and Analytics

Securely pull reports for time + attendance, SST & HSE compliance, site orientation with expiration / lockout dates and quick on-site reporting.

Effortlessly, pull data from all turnstiles and access points around your site.

# COST EFFECTIVE SOLUTIONS WITH ENTERPRISE RESULTS

*Integrated access control hardware with IBC's customized software to offer admittance into a secure space, construction site, building, or office space with real solutions for robust productivity.*

## Workforce Management

- QR Code Worker Pre-Registration
- Contractor Management
- Fast and Simple Badging Process
